POLICE OPERATIONS AGAINST JIHADISM IN 2024

NUMBER OF ADMISSIONS TO PRISON FOR JIHADISM YEAR 2024

However, this number of arrests does not necessarily mean that those involved in such activities are imprisoned. In the prison system, this has resulted in 33 new admissions (four fewer than last year), that is 40% of detainees. This figure is approximate, on the basis that the data obtained from these sources are not complete and there are no official statistics in this respect.

Nationality

Thus, we have only been able to determine the nationality of 23 of the individuals who were imprisoned on the basis of data obtained from open sources. The nationalities of the individuals include Spanish and Moroccan. However, there are a total of seven different nationalities among the new admissions in Spanish prisons: one Algerian, one Mexican, one Hispanic-Jordanian, one Lebanese, one Pakistani and two Hispano-Moroccan. According to the data available, Moroccans account for 39.13% of new arrivals and Spaniards 34.78%. Hispanic-Moroccans account for 8.69 per cent, while the rest of the nationalities account for 22 per cent of all new admissions to prison.

OF THE 33 NEW ADMISSIONS IN PRISON THE FOLLOWING NATIONALITIES STAND OUT:

9 MOROCCAN (39.13%)

8 SPANISH (34.78%)

2 HISPANIC-MOROCCAN (8.69%)

Age

Criminal patterns

Among the criminal typologies of pre-trial detainees for jihadism admitted in 2024, the most important are those related to glorification of terrorism, indoctrination, self-radicalization and financing. There was also a case of threats and damages. Only 6.06% of individuals were considered to be members of a terrorist organization, 18.18% of individuals were imprisoned for collaboration with a terrorist organization. 63.63% were involved in activities of indoctrination, self-indoctrination, recruitment or glorification of terrorism. Some were involved in different types of activity.
